

TROUSERS CIVIL DEFENCE

TECHNICAL DATASHEET

These trousers are suitable for dynamic and comfortable movement in any outdoor scenario, while also performing quite well in leisure activities. The durable material can withstand excessive wear, and with numerous reinforcements significantly increases the lifespan of the trousers. The main advantage is in the perfect relationship between high-quality materials and reinforced parts, a large number of pockets and many functional details. They are a multifunctional garment with a certain degree of water and wind resistance and they provide high degree of adjustment and comfort.
